Project 1

CITC 1301 A70

Monty Python: "Now go away or I will taunt you a second time."

Due: Friday January 26, 2018

Instructions

You will create a python 3 program that uses a main() function to display the following information (as show from when I run my application):

```
Name: David Blair
Major: Programming
Course: CITC 1301 A70
Date/Time: 2018-01-20 16:41:34.186662
```

- Use a main() function to display all information shown above
- Import datetime for: datetime.datetime.today()
- Made certain to comment your code like shown in class examples
  - This includes a header and inline commenting

Deliverables

- Turn in you source code to the D2L dropbox by the due date.
